

August Bee Club Meeting

Due to a poor weather forecast next Monday, and with a Varroa mite treatment plan that should be a priority the Monday the 16th, we have decided to move the meeting to Thursday the 12th.

Brenna M. Hooper will be our guest speaker, Brenna took over the inspection position from Stephanie for the North Okanagan Shuswap. The topic for the meeting will be fall hive preparation. Mite testing, various treatments, feeding, and preparing your hives for winter. More information will be added as we finalize the agenda.
